SUMMARY

To obtain a responsible and challenging Front End Developer's position where my education and work experience will have valuable application.

TECHNICAL SKILLS

Core Java, Spring Framework,
HTML5, CSS3, JavaScript, React, Styled Components, SCSS

TECHNICAL PROJECTS

URL Shortening - Live Github
A landing page which takes any HTTP URL and truncates it. Developed using React hooks, Context API and used axios to handle HTTP requests. Also saved the shortened URLs in the browsers local storage even when refreshing the page URLs persist.

IP Address Tracker - Live Github
A web app which takes IP address as a input (IPv4 or IPv6) and gives the location, timezone, and ISP back. To fetch the location based on the IP address used IP Geolocation API by IPify and to generate the map based on the latitude and longitude of the location used LeafletJS.

World Countries - Live Github
Web app shows all the countries and their information. Used react hooks, context API, styled components for styling and used packages like react-router-dom, axios to handle http requests, framer-motion, react-spinner. Fetching the countries data from REST countries API.
